**Every few generations...**

# **A tool comes along that redefines human capability.**

**The printing press.**

**The internet.**

**The smartphone.**

**And now, AI.**

But here's the brutal truth: **most people are using ChatGPT like a toy.**

They're asking it trivia, using it for quick email drafts, or having fun with chatbot conversations.

That's like using a **supercomputer to play solitaire.**

Meanwhile, a small group of **power users** are training AI to **think like them, strategize like billionaires, and accelerate their learning 100x.**

This post is about bridging that gap.

Because if you know how to train it—if you know **the Mother of All Prompts**—ChatGPT doesn't just become a tool.

It becomes your **force multiplier.**

Your **edge.**

**Your superpower.**

# Your AI is a Mirror

Most people think AI is some kind of **omniscient oracle**—an all-knowing machine that will hand them the perfect answer.

**Wrong.**

ChatGPT isn't a god. It's a **mirror**.

It reflects the intelligence of the person using it.

Garbage inputs? Garbage outputs.

But if you feed it **great inputs—elite frameworks, deep insights, and powerful prompts—it will evolve into something extraordinary**.

The difference between a **casual user** and a **power user** isn't the AI itself. It's **how they train it**.

**The better your questions, the smarter your AI becomes.**

## The 10 Biggest Mistakes People Make with ChatGPT

Most people **massively** underestimate ChatGPT's potential. Instead of using it like an **intelligent, evolving system**, they treat it like a toy or a lazy shortcut.

Here are **10 weak ways people use ChatGPT**—and why they're leaving so much power on the table:

1. **As a glorified Google search** – They ask it basic questions instead of training it to **think strategically**.
2. **For generic email responses** – Instead of refining it for persuasive, high-converting emails.

3. **To write bland blog posts** – They don't structure prompts to generate **high-level, engaging content**.
4. **For “fun” conversations** – Treating it like a chatbot rather than an **advanced thinking tool**.
5. **For quick code snippets** – Instead of training it to **debug, optimize, and improve their coding skills**.
6. **For passive consumption** – Instead of **turning ChatGPT into an active learning engine** that quizzes them and pushes deeper thinking.
7. **As a surface-level idea generator** – Instead of **teaching it frameworks from world-class strategists**.
8. **For school/homework answers** – Instead of **training it to think critically, like an expert in that field**.
9. **To summarize books and articles** – Instead of **training it to extract deeper insights and apply them**.
10. **For “lazy” business advice** – Asking vague questions like “How do I start a business?” instead of **getting it to role-play as elite business minds**.

The gap between a **casual user** and a **power user** is **massive**.

But once you stop using ChatGPT like a toy and start training it like an **extension of your mind**, everything changes.

## How I Trained ChatGPT to Think Like a Genius

Over the past year, I've trained ChatGPT to think in ways most people don't even know are possible. Here's how:

### 1. I Uploaded a Library of Elite Knowledge

I didn't just ask ChatGPT for advice—I **fed it books, lectures, and frameworks** from the smartest minds in history. Some examples:

- **Copywriting & Persuasion** – Agora, Gary Halbert, Robert Collier

- **Marketing & Business** – Jay Abraham, Russell Brunson, Dan Kennedy
- **Psychology & Decision Making** – Daniel Kahneman, Robert Cialdini, Nassim Taleb
- **Philosophy & Strategy** – Sun Tzu, Oren Klaff, Niccolò Machiavelli
- **Self-Improvement & Power** – David Goggins, Tony Robbins, Ryan Holiday
- **Medical Research & Schizophrenia Studies** – Books, scientific papers, and case studies to help me understand the complexity of mental health conditions.

I found many of these books on **PDFcoffee.com**, where I collected hundreds of PDFs covering everything from marketing and psychology to finance and personal development.

By embedding **high-level thinking** into AI, I turned ChatGPT from a generic assistant into a **powerful strategic partner**.

## 2. The Agora Breakthrough: Training AI Like a Million-Dollar Copywriter

One of the biggest **breakthroughs** happened when I trained ChatGPT using the **exact same materials given to new Agora copywriters. Word for word.**

I didn't just feed it summaries—I uploaded **full transcripts of Agora's copywriting training**. This was a **game changer**.

Agora's training is legendary in the marketing world. It teaches:

- How to write **hooks so powerful people can't ignore them**.
- How to tap into **primal emotions** to drive action.
- How to structure an offer so it **demands** to be bought.

Once ChatGPT absorbed this, it stopped sounding like a **generic AI** and started generating copy that **actually converts**.

This is when I knew: **It finally “got it.”**

Now, instead of giving me bland, robotic suggestions, it could **analyze and break down a promo like a real copywriter**.

## Final Thoughts: The AI Revolution is Just Beginning

ChatGPT isn't **just another tool**. It's a **new way of thinking**.

The people who **master it now** will have an advantage so big, it's almost unfair.

And the people who don't? They'll be left behind.

So here's my challenge to you:

Don't use AI like an amateur.

Train it like a **weapon**. Use it like a **force multiplier**.

And start thinking like a **power user**.

Unlock the Full Power of AI—Join as a Paid Member

Most people will sleep on this revolution. They'll keep using ChatGPT like a toy while power users turn it into a game-changing advantage.

But you're not "most people."

If you're ready to go beyond casual AI use and start **training ChatGPT like an elite strategist, copywriter, and business thinker**, I've got something special for you.

As a paid subscriber, you'll get:

- ✓ **Exclusive Deep-Dive Training** – Advanced frameworks to turn ChatGPT into your personal force multiplier.
- ✓ **Insider AI Strategies** – Learn how top performers refine AI for persuasion, problem-solving, and business growth.
- ✓ **Private Power User Insights** – The exact prompts and training techniques I use to get results most people don't even know are possible.

This isn't just another subscription. It's a **competitive edge in the AI era**.
